***Response to Amendment***

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by (Staiger et al or Strobel et al). (Staiger et al or Strobel et al) discloses a headlight ***for a motor vehicle, for travel along a road defining an axis of the road which is the general direction of travel of the vehicle.*** The headlight comprises a light source 3 and optical reflector 1 adjacent to the light source 3 ***for producing a beam which is generally spread widthwise with respect to the axis of the road.*** The optical reflector ***is adapted to create in the beam two distinct zones of maximum light intensity.*** Wherein the optical reflector has a central axis passing through the light source in the beam direction, and is asymmetrical along a plane on the central axis so as to create different angular offset between the two zones.

The examiner highlighted applicant's use language that was given very little patentable weight in the examination.
